Employer: Skidaway Institute of Oceanography

An Information Services support position for the Skidaway Institute of Oceanography is open until filled beginning August 1st 2017. The position supports onsite systems including research equipment, infrastructure and end-user applications along with cloud based systems. The position will be a two day a week paid position that would continue while the intern is actively pursuing a degree or for a 6 months post-graduation period. The candidate will work directly with the director of IT. The position is open to a broad range of students including but not limited to the Information technology, educational technology and the sciences.
