Research Experiences for Undergraduates in Security for Mobile Sensing

at Columbus State University

The TSYS School of Computer Science at Columbus State University is pleased to announce the development of a NSF CISE REU Site in Security for Mobile Sensing. In our program, undergraduate students will participate in an 8-week research experience at Columbus State University in researching problems and issues related to security, privacy, authentication, data integrity, and malware for Mobile Sensing Environments. For the year 2017, the program will run from May 30 / 2017 to July 26 / 2017. This site is supported by the Department of Defense in partnership with the NSF REU program.

Students will be awarded a stipend of $4000 plus travel, meals, and on campus housing. The program incorporates professional development activities in addition to visits to IT companies in Columbus GA. The application process will close in March 11/2017. Awardees will be notified by April 2017. U.S. Citizenship or permanent residency is required. Women, minorities and students with disabilities are encouraged to apply. Information about the program can be found at http://www.reucsu.org.
