Armstrong State University Department of Biology Announces a Lecture by

Mr. Houston Chandler

Conserving reptile and amphibian diversity in Longleaf Pine ecosystems

Thursday, November 2, 2017, 4:00 – 5:15pm
Armstrong Center Auditorium

Mr. Houston Chandler is a Species Coordinator with the Orianne Society where he is responsible for applied conservation research involving reptiles and amphibians. He received a Master of Science in Fish and Wildlife Conservation from Virginia Tech University. In addition to conservation science, Mr. Chandler’s research has examined the effects of climate change and fire-suppression on community structuring.
