Announces a Lecture by
Ms. Jessye Kirkham

Habitat preference of the daggerblade grass shrimp *Palaemonetes pugio* and whether field preference is correlated with the trematode parasite *Microphallus turgidus*

Wednesday February 28, 2018 4:00 – 5:15pm
Science Center 1407

Ms. Kirkham is a graduate student at Savannah State University and an Armstrong alumnus. Her research has focused on determining the seasonal patterns of trematode infections in grass shrimp and whether trematode abundance influences shrimp habitat selection.
