MEMORANDUM

To: Graduate Curriculum Committee

From: Grace Fleming, School of Graduate Studies

Date: 2/11/2008

Subject: Minutes for January 30, 2008

The Graduate Curriculum Committee met in Victor 219, Wednesday, January 30, 2008 at 1:30 pm., with members Camille Stern and Mike Price (chair) in attendance. Guests attending were Mark Finlay, Donna Brooks, Jill Bell, Melinda McAllister, and Grace Fleming. Members who submitted votes by electronic communication were: Greg Wimer, Sabitra Brush, Robert Lefavi, and Ray Hashemi.

I. Minutes of November 28, 2007 were approved.

II. The following items were approved:

I. College of Arts and Sciences

G. History

1. Create the following course:
   HIST 5670U/G Topics in the History of Women and Gender in Europe
   3-0-3
   Prerequisites: Either HIST 1111, HIST 1111H, HIST 1112, HIST 1112H
   or permission of instructor
   Graduate Prerequisite: Admission to graduate program
   Description: Selected topics in the history of women and gender relations in Europe. May be repeated as topics vary.

   Rationale: This topics course will provide advanced undergraduate and graduate students with an opportunity to study particular aspects of the history of women and gender in Europe. This course parallels Topics in the History of Women and Gender: America and can serve the Gender and Women’s Studies Program. Graduate students will have additional reading, writing, and oral assignments as required by the individual professor.

   Effective Term: Spring 2008

   CURCAT:
   Major Department: History
Can course be repeated for additional credit: Yes  
Maximum number of Credit Hours: 6  
Grading Mode: Normal  
Instruction Type: Lecture  

2. Modify the following course:
HIST 5660U/G Topics in the History of Women and Gender in America 3-0-3  

Prerequisites: One course in American history at the 2000 level or above or permission of instructor

Graduate Prerequisite: Admission to graduate program

Description: Selected topics in the history of women and gender relations in America, offering analysis and synthesis, which address the larger context of gender definition(s) and gender relations. May be repeated as topics vary.

Rationale: The modified title and description parallel Topics in the History of Women and Gender: Europe while maintaining different prerequisites.

Effective Term: Spring 2008

II. College of Health Professions  
C. Health Sciences  
1. Create the following course:
PUBH/SMED 5600 U/G Healthy Weight Mgmt & Body Comp 3-0-3  

Undergraduate Prerequisite: none  
Graduate Prerequisite: none  

Description: A survey of research and applications for methods of improving body composition with a focus on optimal health and physical performance. Students will investigate effective strategies for long-term changes in body fatness and lean body mass.

Rationale: Students in the fitness management and public health BHS tracks graduate to encounter a society desperately in need of practical information to reduce the incidence of childhood / adolescent obesity as well as disorders related to adult over-fatness. In an attempt to meet the pragmatic health promotion needs of communities, this course goes beyond general nutritional and exercise recommendations and provides students with day-to-day specific nutrition / exercise counseling skills and resources so clients can monitor and evaluate progress in a program designed to facilitate moderate long-term, body fat reduction. Graduate students will propose a research study in which the concepts of practical nutritional and exercise advice discussed in the course, will be evaluated.

Effective Term: Summer 2008
2. Create the following course:
   **MHSA 5800 U/G Comparative Health Care Systems**
   3-0-3
   **Undergraduate Pre-requisite:** HSCC 2500
   **Graduate Pre-requisite:** PUBH 7100
   **Description:** An in depth survey of the structure, function, and comparative performance of a variety of health care delivery and financing systems in the U.S. and other nations of the world.

   **Rationale:** No course currently exists at AASU that covers this content as provided in the course description. A similar course – PUBH 5560 (Introduction to International Health) – is taught from an epidemiological perspective and focuses most exclusively on public health issues faced by those systems. Graduate students will have additional reading, writing, and oral assignments as required by the individual professor.

   **Effective Term:** Summer 2008.

F. Communication Sciences and Disorders

1. Create the following course:
   **CSDS 7141 Cognitive and Linguistic Foundations of Language**
   3-0-3

   **Prerequisite:** CSDS 2240 or equivalent
   **Description:** Presents an overview of the nature, and development of cognitive and linguistic skills needed for effective communication. Topics to be addressed include but are not limited to development of object permanence auditory and visual memory, and meta-linguistics and Brown’s stages of development. Cultural factors related to cognition and linguistics will be discussed. Field experience may be required.
Rationale: The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states the following in its Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology for 2008: The program must provide opportunities for students to acquire and demonstrate knowledge of the nature of speech, language, hearing, and communication disorders . . . These opportunities must be provided in the following areas: cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning) (Standard 3.1B).

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders
Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 3
Grading Mode: Normal
Instruction Type: Lecture

2. Create the following course:
CSDS 7146 Language Disorders in School-age Children
3-0-3

Prerequisite: CSDS 2240 or equivalent
Description: Examines theoretical perspectives and various approaches to working with children and adolescents with language impairments. Practical application of language assessment procedures, individualized intervention planning and language intervention strategies will be discussed. The multicultural and multidimensional nature of language will be addressed, as well as language requirements for successful classroom performance from school entry through high school.

Rationale: The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states the following in its Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology for 2008: The program must provide opportunities for students to acquire and demonstrate knowledge of... receptive and expressive language (phonology, morphology, syntax, semantics, and pragmatics) in speaking, listening, reading, writing, and manual modalities. Curricula should also consider developmental correlates of speech and language disorders. The current course (CSDS 7139) covers more than half of the developmental period for communication. The separation of this course content will allow for students to grasp a vast amount of information according to recognized development
periods. This course will cover the school-age developmental period which includes the developing language period, the school years and adolescence (Standard 3.1B).

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders
Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 3
Grading Mode: Normal
Instruction Type: Lecture

3. Create the following course:
CSDS 7145 Language Disorders in Early Childhood
3-0-3

Prerequisite: CSDS 2240 or equivalent
Description: This course covers assessment and treatment of infants and toddlers with a variety of speech, language, feeding, and oral motor disorders. Typical development and atypical development will be overviewed, as well the importance of working with families through the establishment of individualized family service plans. Intervention models for diverse populations will also be discussed.

Rationale: The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states the following in its Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology for 2008: (Standard III-B) The program must provide opportunities for students to acquire and demonstrate knowledge of... receptive and expressive language (phonology, morphology, syntax, semantics, and pragmatics) in speaking, listening, reading, writing, and manual modalities. Curricula should also consider developmental correlates of speech and language disorders. The current course (CSDS 7139) covers more than half of the developmental period for communication. The separation of this course content will allow for students to grasp a vast amount of information according to recognized development periods. This course will cover the early language developmental period from birth to 3 years which includes the neonatal period, prelinguistic period, emerging language period (Standard 3.1B).

Effective Term: Summer 2008
4. Create the following course:
CSDS 7150 Swallowing Disorders
3-0-3

Prerequisite: CSDS 7144
Description: The study of anatomy and physiology related to the swallowing mechanism and the nature of dysphagia, as well as current practices in the assessment and treatment of swallowing disorders in children and adults with various etiologies. Cultural implications of swallowing disorders will be discussed. Field experience/observation anticipated.

Rationale: The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states in its Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology for 2008 that, “The program must provide opportunities for students to acquire and demonstrate knowledge of the nature of speech, language, hearing, and communication disorders, as well as swallowing disorders . . . These opportunities must be provided in the following areas: . . . swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myofunction) (Standard 3.1B). Therefore, we are requesting the addition of a required dysphagia in order to strengthen our program and maintain our accreditation by aligning it with the upcoming ASHA accreditation standards.

Effective Term: Summer 2008

5. Create the following course:
CSDS 7147 Language and Literacy
3-0-3

Prerequisite: CSDS 2240 or equivalent, CSDS 71XX Language Disorders in School-age Children

Description: This course provides an overview of the skills necessary for literacy acquisition, the progression of literacy development and its relationship with language. Students will learn to identify and promote emergent literacy skills, acquire strategies to support the developing reader, gain knowledge of disorders of spoken language and literacy, discuss methods for assessing language-based literacy skills and develop a literacy-based language intervention unit to target all components of language (phonology, pragmatics, morphology, syntax, and semantic).

Rationale: The American Speech-Language Hearing Association (ASHA) states that the scope and practice of a speech-language pathologist includes service delivery in both oral and written language. The fundamental connections between spoken and written language necessitate that intervention for language disorders target written as well as spoken language needs. ASHA also states that academic programs must add to the knowledge and training of future speech language pathologist to ensure that they are equipped to support the development of: (a) spoken language as a foundation for learning to read and write; (b) sound and word level awareness for grasping the alphabetic principle; (c) comprehension and formulation skills for using complex semantics and syntax; and (d) knowledge of literate discourse structures for comprehending and producing coherent spoken and written texts.

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders
Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 3
Grading Mode: Normal
Instruction Type: Lecture

6. Create the following course:
CSDS 7152 Acquired Cognitive-Communication Disorders
3-0-3

Prerequisite: CSDS 7144
Description: Presents an overview of the nature, assessment, and treatment of cognitive-communication disorders, including (but not limited to) communication impairments related to acquired deficits in
attention, memory, problem solving, and executive function. Specific etiologies to be discussed include traumatic brain injury, dementias, and right hemisphere damage. Cultural implications of cognitive-communication disorders will be discussed. Field experience may be required.

Rationale: The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states the following in its Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology for 2008: The program must provide opportunities for students to acquire and demonstrate knowledge of the nature of speech, language, hearing, and communication disorders . . . These opportunities must be provided in the following areas: cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning) (Standard 3.1B).

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders
Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 3
Grading Mode: Normal
Instruction Type: Lecture

7. Change the following course credit hours and from S/U to letter grade:  
CSDS 7153 Practicum I-AASU Clinic 0 1-2-2
3

Rationale: All Graduate students accepted in the master’s program must successfully complete their first clinical placement in the university clinic prior to any outside placement. Students enrolled in Practicum I, AASU Clinic are expected to complete more than 50 clinical clock hours of service to clients. Clinical assignments are made around the student’s class schedule and are typically from 8 am to 5 pm. Students enrolled in CSDS 7154 and CSDS 7155 are required to complete 12 weeks of full-time placements, which typically begin at 8:00 am and end at 4 pm. Number of credit hours earned appears inadequate for the amount of time spent by the student in the accrual of clinical clock hours as described by ASHA for eligibility for the certificate of clinical competence and the Georgia Board of Examiners for Speech Language Pathology for a Georgia State license. In regards to the change to letter grade, The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states the following in its Standards for Accreditation of Graduate Education Programs in
Audiology and Speech-Language Pathology for 2008: (Standard 5.2) The program must describe the process used by the program to develop, validate, and assess student learning outcomes for the knowledge and skills required for entry into professional practice. Use of a letter grade in Practicum course will enable the program to better show attainment of clinical skills. The current S/U does not allow the program to differentiate the skill levels of a student with A performance versus the skill level of a student having performed at the ‘B’ level.

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders
Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 2
Grading Mode: Normal
Instruction Type: Practicum

8. Change the following course credit hours, prerequisites and from S/U to letter grade:

CSDS 7154 Practicum II-Educational Setting
0 1-2-2 3
Prerequisite: CSDS 7145, CSDS 7146, CSDS 7153, CSDS 7157 and permission of program faculty

Rationale: All Graduate students accepted in the master’s program must successfully complete their first clinical placement in the university clinic prior to any outside placement. Students enrolled in Practicum I, AASU Clinic are expected to complete more than 50 clinical clock hours of service to clients. Clinical assignments are made around the student’s class schedule and are typically from 8 am to 5 pm. Students enrolled in CSDS 7154 and CSDS 7155 are required to complete 12 weeks of full-time placements, which typically begin at 8:00 am and end at 4 pm. Number of credit hours earned appears inadequate for the amount of time spent by the student in the accrual of clinical clock hours as described by ASHA for eligibility for the certificate of clinical competence and the Georgia Board of Examiners for Speech Language Pathology for a Georgia State license.

In regards to the change in prerequisites, the new prerequisites reflect the necessary coursework students must complete in order to successfully delivery services to the clients served during this clinical placement. This change also reflects the changes in and the additions to the graduate curriculum.
In regards to the change to letter grade, The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states the following in its Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology for 2008: (Standard 5. 2) The program must describe the process used by the program to develop validate and assess student learning outcomes for the knowledge and skills required for entry into professional practice. Use of a letter grade in Practicum course will enable the program to better show attainment of clinical skills. The current S/U does not allow the program to differentiate the skill levels of a student with A performance versus the skill level of a student having performed at the ‘B’ level.

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders
Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 2-3
Grading Mode: Normal
Instruction Type: Practicum

9. Change the following course credit hours, prerequisites and from S/U to letter grade:
CSDS 7155 Practicum III- Medical Setting
0-1-2-3

Prerequisite: CSDS 7150, CSDS 7151, CSDS 7152, CSDS 7153, and permission of program faculty

Rationale: All Graduate students accepted in the master’s program must successfully complete their first clinical placement in the university clinic prior to any outside placement. Students enrolled in Practicum I, AASU Clinic are expected to complete more than 50 clinical clock hours of service to clients. Clinical assignments are made around the student’s class schedule and are typically from 8 am to 5 pm. Students enrolled in CSDS 7154 and CSDS 7155 are required to complete 12 weeks of full-time placements, which typically begin at 8:00 am and end at 4 pm. Number of credit hours earned appears inadequate for the amount of time spent by the student in the accrual of clinical clock hours as described by ASHA for eligibility for the certificate of clinical competence and the Georgia Board of Examiners for Speech Language Pathology for a Georgia State license.
In regards to the change in prerequisites, the new prerequisites reflect the necessary coursework students must complete in order to successfully
delivery services to the clients served during this clinical placement. This change also reflects the changes in and the additions to the graduate curriculum.

In regards to the change to letter grade, The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) states the following in its Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology for 2008: (Standard 5. 2) The program must describe the process used by the program to develop validate and assess student learning outcomes for the knowledge and skills required for entry into professional practice. Use of a letter grade in Practicum course will enable the program to better show attainment of clinical skills. The current S/U does not allow the program to differentiate the skill levels of a student with A performance versus the skill level of a student having performed at the ‘B’ level.

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders

Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 2 3
Grading Mode: Normal
Instruction Type: Practicum

10. Change the following course name:
CSDS 7142 Speech-Language Pathology Program Administration Professional and Ethical Issues in Communication Sciences and Disorders 3-0-3

Rationale:
Current name did not accurately reflect content of class; new name better indicates the scope of information being taught.

Effective Term: Summer 2008

CURCAT
Major Department: Communication Sciences and Disorders
Can Course Be Repeated For Additional Credit: No
Maximum Number of Credit Hours: 3
Grading Mode: Normal
Instruction Type: Lecture
11. **Change the following course name:**

   CSDS 7151  
   Adult Language Impairment  
   Aphasia and Related Neurogenic Disorders  
   3-0-3

   **Rationale:**
   Name change to adequately reflect the types of language impairments found in the neurogenic population; especially in adults.

   **Effective Term:** Summer 2008

---

12. **Delete the following course:**

   CSDS 7139  
   Childhood Language Disorders  
   3-0-3

   **Rationale:** The breadth and depth of language impairments in children from birth to adolescence is too substantial to be adequately presented in one class; course content has been divided into two required courses. This division will allow for a more thorough presentation of core knowledge that is vital for the completion of an academic program in CSD and for a successful and independent professional practice. The creation of two separate courses will also allow for students to grasp a vast amount of information according to recognized development periods (birth to 3 years and school-age) utilized by communication specialist to differentiate between phases of language development in children.

   **Effective Term:** Summer 2008

---

13. **Modify Program of Study for the Degree of Master of Science in Communication Sciences and Disorder**

   **A. Professional Education** .................................. 3 hours
   FOUN 7060  
   Educational Research

   **B. Specialized Content** ................................. 36 hours **54 hours**
   CSDS 7139  
   Childhood Language Impairment
   CSDS 7140  
   Diagnosis and Appraisal of Communication Disorders
CSDS 7142 Speech-Language Pathology Program

Administration Professional and Ethical Issues in Communication Sciences and Disorders

CSDS 7144 Neuro-anatomy and Physiology
CSDS 7148 Oral and Speech Motor Disorders
CSDS 7149 Aural Rehabilitation
CSDS 7150 Adult Language Impairments Aphasia and Related Neurogenic Disorders

CSDS 7156 Voice and Fluency Disorders
CSDS 7157 Articulation and Phonological Disorders
CSDS 7141 Cognitive and Linguistic Foundations of Language
CSDS 7146 Language Disorders in School-age Children
CSDS 7145 Language Disorders in Early Childhood
CSDS 7147 Language and Literacy

CSDS 7150 Swallowing Disorders
CSDS 7152 Acquired Cognitive-Communication Disorders
CSDS 7153 Practicum I – AASU Clinic
CSDS 7154 Practicum II – Educational Setting
CSDS 7155 Practicum III – Medical Setting
