1. On the Home screen, click on your Menu icon or button. The screen below will appear at the bottom of your phone. Then select the Settings icon.

2. The screen below will appear. Select Wireless & Networks from the list shown.

3. Select Wi-Fi from the list.

Note: If your Wi-Fi is disabled, this will enable it.
4. Now select **Wi-Fi settings** on the same screen.

5. The following screen should appear. Scroll to the bottom and select add Wi-Fi network.
6. The screen below will appear. Use the following settings. Leave any settings not shown blank or un-checked.
7. Now that you have created and saved the “Armstrong” profile try to connect it from your Wi-Fi networks. You should see it trying to connect as shown below.

8. You should now be connected to “Armstrong”.
