Connecting to Armstrong Wi-Fi: Ubuntu 10.10

1. From the list of available wireless networks, choose “Armstrong”.

   The Authentication required by wireless network window appears.

2. Make sure you are using the correct encryption settings as set below:

   **The Username is your Port Username and the Password is your Port password**
3. Click on Connect.

The No Certificate Authority certificate chosen window appears.

4. Click on Ignore.

**Be sure to check the box next to “Don’t warn me again”

The Unlock Keyring window appears.

5. Type in your Admin password and click on OK.

6. You will see the following message window when your machine has successfully connected to the “Armstrong” wireless network.
