The Turnitin Feedback Studio is similarity checking, online feedback, and rubric grading tools for evaluating student work.

To open the Feedback Studio, click on the percentage number or the solid color in the student’s submissions area.

Now you will see the student’s paper and the tools that you have to work with on the right-hand side of the page. If you click on the top layer of paper, you will be able to see the Active layers.

- The blue check mark opens up commonly used Quick Marks that you may use.

- The pencil shows how you can leave written or recorded feedback for your student.

- The blue blocks indicate the rubric. You may choose to set up a Rubric within Turnitin.

- The number indicates the percentage of the paper that Turnitin views as plagiarized. If you click on the number you will see where the information has originated from.

- The lines below the number will show all sources.

- The filter allows you to choose to exclude quotes, bibliography, or any number or percentage of words after the submission has been evaluated by Turnitin.

- The circle with the line through it shows that no sources have been excluded.

- The italicized “I” with the circle around it will show the submission details.

- The arrow with the line under it indicates the ability to download the document.
Once you have reviewed the student’s document, you can place a grade in the box at the top of the page.

The grade will remain displayed here, but you will need to manually add the grade to the Gradebook. To add the grade to the Gradebook, close Turnitin and go back into the Assignments area, click on the Evaluate link, and input the grade. You may also enter any comments that you wish to leave for the student. Once you hit the Publish button at the bottom, the grade will go directly into the Gradebook.
