Account Options and Settings in Windows 10

Account Options

Clicking on the circle with the Armstrong Start Strong logo inside, located in the Start Menu, provides access to lock your computer, sign out of your computer, or switch users. ITS requires users to lock or log off when their machine is unattended.

Power Options

Clicking the Power Options icon, located in the Start Menu, takes you to the computer’s power options. From here, you have the option to put your computer to sleep, shutdown, or restart your computer. ITS recommends clicking restart at minimum once every two weeks.
Windows Settings

Clicking the Settings gear button from the Start Menu takes you to the new Windows Settings.

This window provides access to a number of different settings that can improve the functionality and experience in Windows 10.
