Mathematica for Students: Installation Instructions

1. Insert the CD and run the installer. (On a Macintosh, just drag the application icon onto the Applications folder.)

2. When the installation is complete, start Mathematica. Click the "Enter Password" button.

3. Select "Single-Machine License," and fill in the name, organization (AASU), and license number fields. (See/email Dr. Hollis or your professor for the license number.) Click OK.

4. You should see a number something like 6139-82044-10720 in the "MathID" field. Write it down. Then click the "Web" button. Your web browser will take you to the Wolfram website.

5. Fill out the web form with your name, email address, organization (AASU), license number, and MathID to request a password specific to your computer. **Important:** *You must use your AASU student email address on this form. Otherwise you will not receive a password.*

6. Wolfram Research will immediately email your password to Dr. Hollis, who will then forward it to your AASU student email address. If this doesn't happen within 24 hours, email Dr. Hollis at shollis@armstrong.edu.

7. Once you've successfully installed Mathematica, please return your CD to your math professor, Dr. Hollis, or the math department secretary, or pass it along (with these instructions) to another AASU student.

   See or email Dr. Hollis if you have any questions or problems. shollis@armstrong.edu

Note: If you have trouble finding your MathID, start Mathematica without a password, and enter this command:

\$MachineID
